Agriculture Commissioner

To Those Interested in West Virginia Agriculture

We are pleased to have a part in bringing you these statistics on West Virginia's agriculture. It is very important during this period of economic readjustment that we have up-to-date information on our most vital resource—Agriculture. All of us in West Virginia, the United States and much of the world depend upon the food and fiber produced in the United States. Because of serious economic conditions, the producer, transporter and processor of our agricultural products need all the information possible to help hold costs in line. Also government requires accurate and up-to-date information for decision making.

Agriculture is about the only area of our economy that has been able to surpass the competition from foreign countries. We cannot allow this to change. All of our citizens should know about the great success of American agriculture and that it is something we all should appreciate and support. In no other country does one have the quality and quantity of food that we do for such a small percentage of our income.

Information presented in this bulletin is provided voluntarily by thousands of West Virginia farmers and agriculturally related businesses to whom we are grateful. I wish to thank the Tax Assessors and their deputies who provide agricultural statistics for their respective counties. In addition, I wish to acknowledge the assistance of the enumerators employed through NASDA who collect much of the data by interview.

I am

Very truly yours,

Gus R. Douglass
Agriculture Commissioner

CROP WEATHER CONDITIONS 1981

The winter of 1981 temperatures averaged below normal. Precipitation during this time was also below normal. Spring temperatures were below average early in the season and above average toward the end of the season. The below average temperatures were accompanied by below average precipitation while above average precipitation delayed some field work late in the season. Summer was characterized by normal and above normal temperatures. This was broken by cool temperatures near the first of July and August. Summer rainfall was near average for the season. Fall brought below average temperatures and precipitation. There were also some early frosts across the State.

WEST VIRGINIA 1981 FIELD CROP PRODUCTION

The 754,500 acres of principal crops harvested by West Virginia farm operators in 1981 were 5 percent above the previous year. In addition 218 million pounds of apples and peaches were harvested this past year, compared to 267 million pounds in 1980.

Corn acres harvested for grain increased 10,000 acres to 68,000, a seventeen percent rise. With yield up 3 bushels to 92 per acre, production took a 21 percent jump to 6,256,000 bushels. Corn acres harvested for silage was off 5,000 acres to 32,000. With yield steady at 15.5 tons per acre, production was off 14 percent to 496,000 tons.

Total small grain harvested acres at 32,000 acres was 10 percent above 1980 as each crop took a 1,000 acre increase. Wheat acres harvested stood at 10,000 but yield fell 2 bushels to 36 per acre. Production at 360,000 bushels was still 5 percent over 1980. Oats harvested were 12,000 acres with yield up 2.5 bushels to 51.5 per acre. Production rose nearly 15 percent to 618,000 bushels. Barley yield jumped 11 bushels to 55 per acre. This helped push production to 550,000 bushels or 39 percent above 1980. Tobacco acreage harvested increased 300 acres in 1981 to 1,500 acres. Yield rose to 1,620 pounds per acre resulting in production of 2,430,000 pounds or 35 percent more than in 1980.

All hay acres harvested increased 25,000 to 620,000 acres. Yield decreased 20 percent to 1.32 tons per acre. Production at 817,000 tons was a decrease of 16 percent from 1980. Alfalfa acres harvested were unchanged at 80,000 while yield fell slightly to 2.45 tons per acre. Production at 196,000 tons was off 4 percent. Acres of all other hay harvested rose 5 percent to 540,000. However, the yield drop of 0.35 ton lowered production one-fifth to 621,000 tons.

FRUIT PRODUCTION 1981

General: Fruit production for the 1981 crop year was below normal due to unfavorable weather conditions early in the season. Frosts early in April followed by below normal temperatures and damp conditions kept fruit rated in fair to poor condition from April through July. During late July and August, the extent of the damage became more apparent and the crop condition declined to a poor rating and remained as such for the rest of the season.

APPLES: The 1981 apple crop of 200 million pounds (4,760,000 42-lb. equivalents) was 18 percent below 1980's 245 million pounds and 23 percent below 1979's 260 million pounds.

York Imperial continued as the leading variety with 73.5 million pounds, 37 percent of the total production. Following in order are: Golden Delicious, 39.0 million pounds, (20%); Delicious, 28.0 million pounds, (14%); Rome Beauty, 19.5 million pounds, (10%); and Stayman, 16.0 million pounds, (8%).

Of the 200 million pounds produced, 49 percent or 97.4 million pounds went to fresh sales, 13 percent more than last year's fresh sales. The remaining 102.6 million pounds was utilized for processing with 47.2 million pounds canned, 17.5 million pounds frozen, 35.0 million pounds for juice and cider, and 2.9 million pounds for other processing.

The value per pound reacted to the short crop by increasing 47 percent from 1980 to 11.5 cents per pound. In spite of a smaller apple crop, there was a 20 percent increase in value of sales to a total of $22,925,000 in 1981.

PEACHES: The 1981 peach crop dropped 18 percent from 1980 to 18 million pounds (375,000 48-lb. equivalents). The price per pound rose 16 percent to 15.3 cents per pound in 1981. But the decreased production caused the value of production to drop 5 percent from 1980 to $2,754,000.

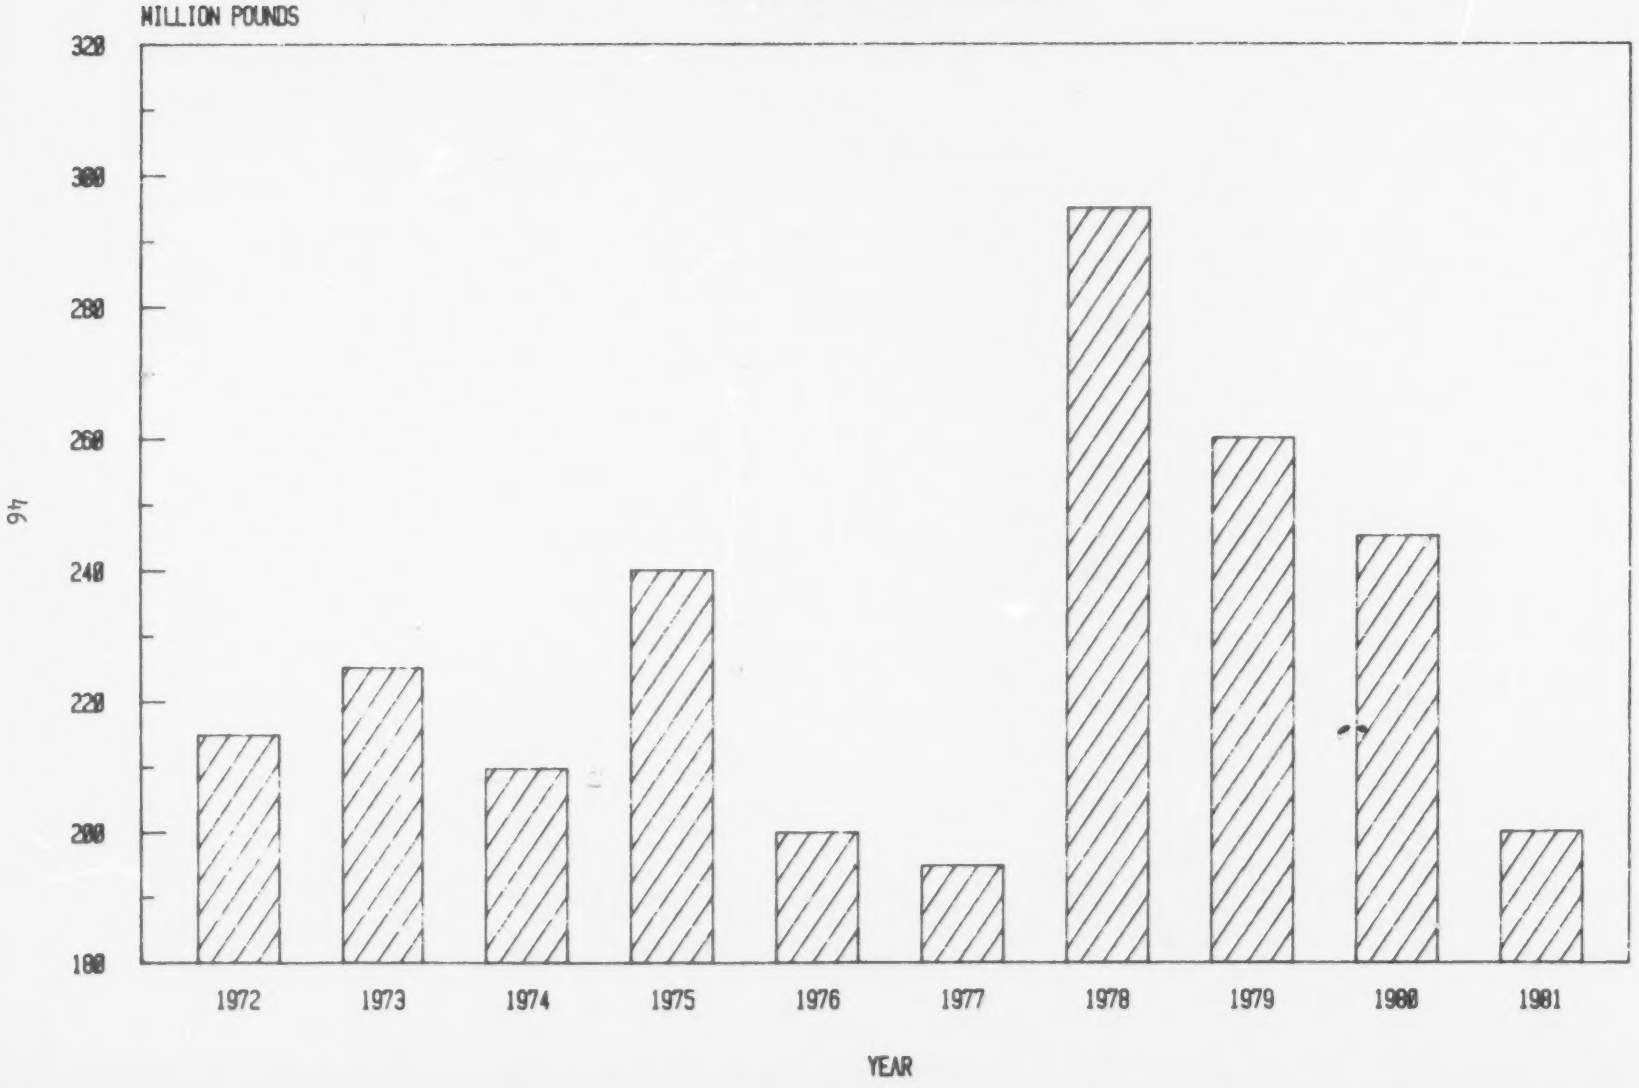
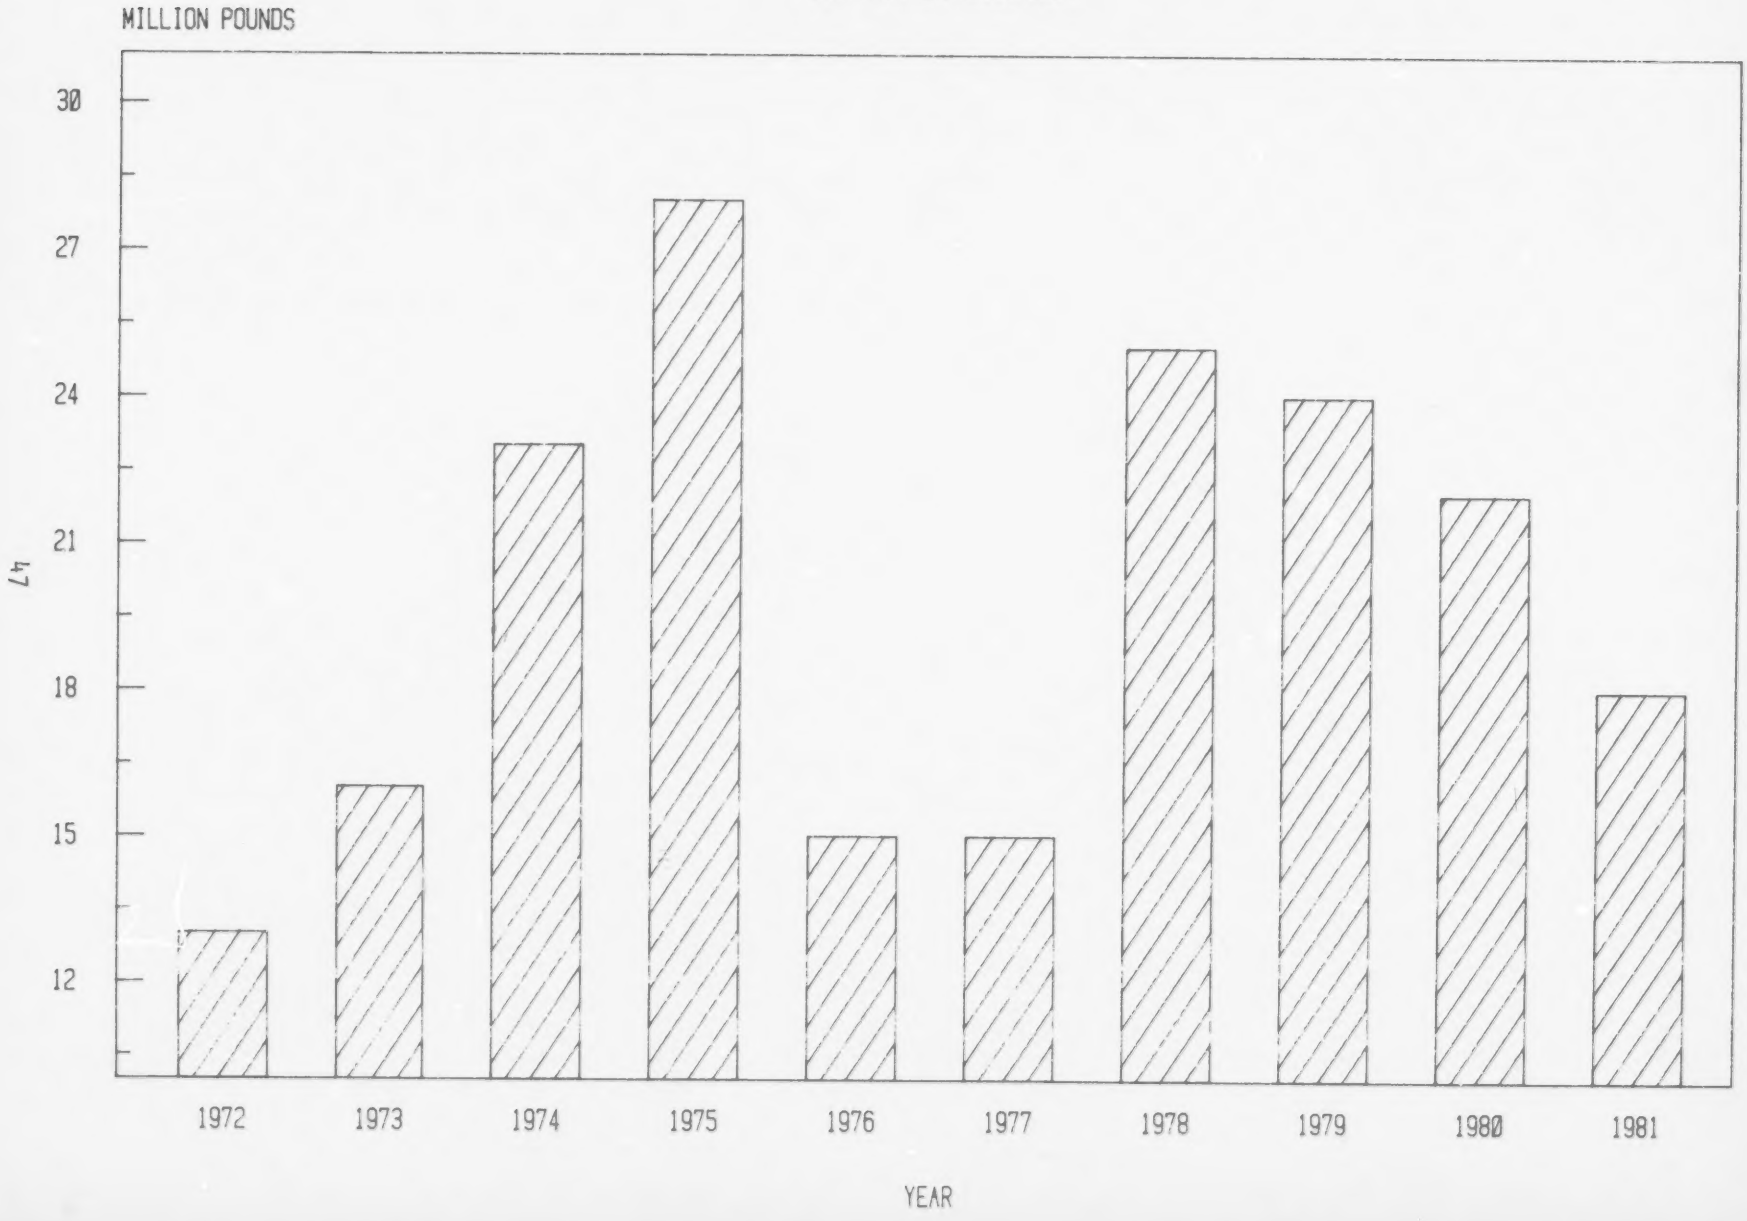
WEST VIRGINIA APPLES

COMMERCIAL PRODUCTION FOR 1972-81



WEST VIRGINIA PEACHES

COMMERCIAL PRODUCTION



FRUIT TREES AND ACREAGE - 1981

General: During the winter and spring of 1982, the West Virginia Crop and Livestock Reporting Service conducted a Fruit Tree Survey, contacting commercial fruit orchards across the State. The fruit tree numbers and acreages contained in this bulletin were determined by tabulating all returned questionnaires.

The primary fruit producing area in West Virginia consists of Berkeley, Hampshire, Jefferson and Morgan counties in the Eastern Panhandle region. These four counties contain 96 percent of the acreage in West Virginia commercial orchards.

APPLES: The number of apple trees in commercial orchards in West Virginia in 1981 totaled 992,333 trees of which 646,896 trees were classified standard and 345,437 trees were classified dwarf and semi-dwarf. Berkeley county accounted for 46 percent of the total with 451,562 trees, followed by Jefferson with 228,084 trees (23%).

There were 17,827 acres devoted to apples in West Virginia for an average of 56 trees per acre. Berkeley county led all counties with 7,919 acres or 44 percent of the State's acreage.

Delicious accounted for the largest number of trees with 291,938, or 29 percent of the total trees. Next in line was York Imperial with 213,767 trees (22%), Golden Delicious with 204,905 (21%) and Rome Beauty with 99,366 trees (10%).

PEACHES: In commercial peach orchards in 1981, the number of trees totaled 276,169. Berkeley county accounted for the largest portion with 143,207 trees or 52 percent of the State's total. The number of acres used for peach production in 1981 totaled 3,622, leading to an average of 76 trees per acre.

Loring was the variety which contained the largest portion of trees with 67,429 (24%). Redhaven followed with 43,367 trees (16%) and Blake was next with 32,631 trees (12%).

1981 WEST VIRGINIA PEACHES

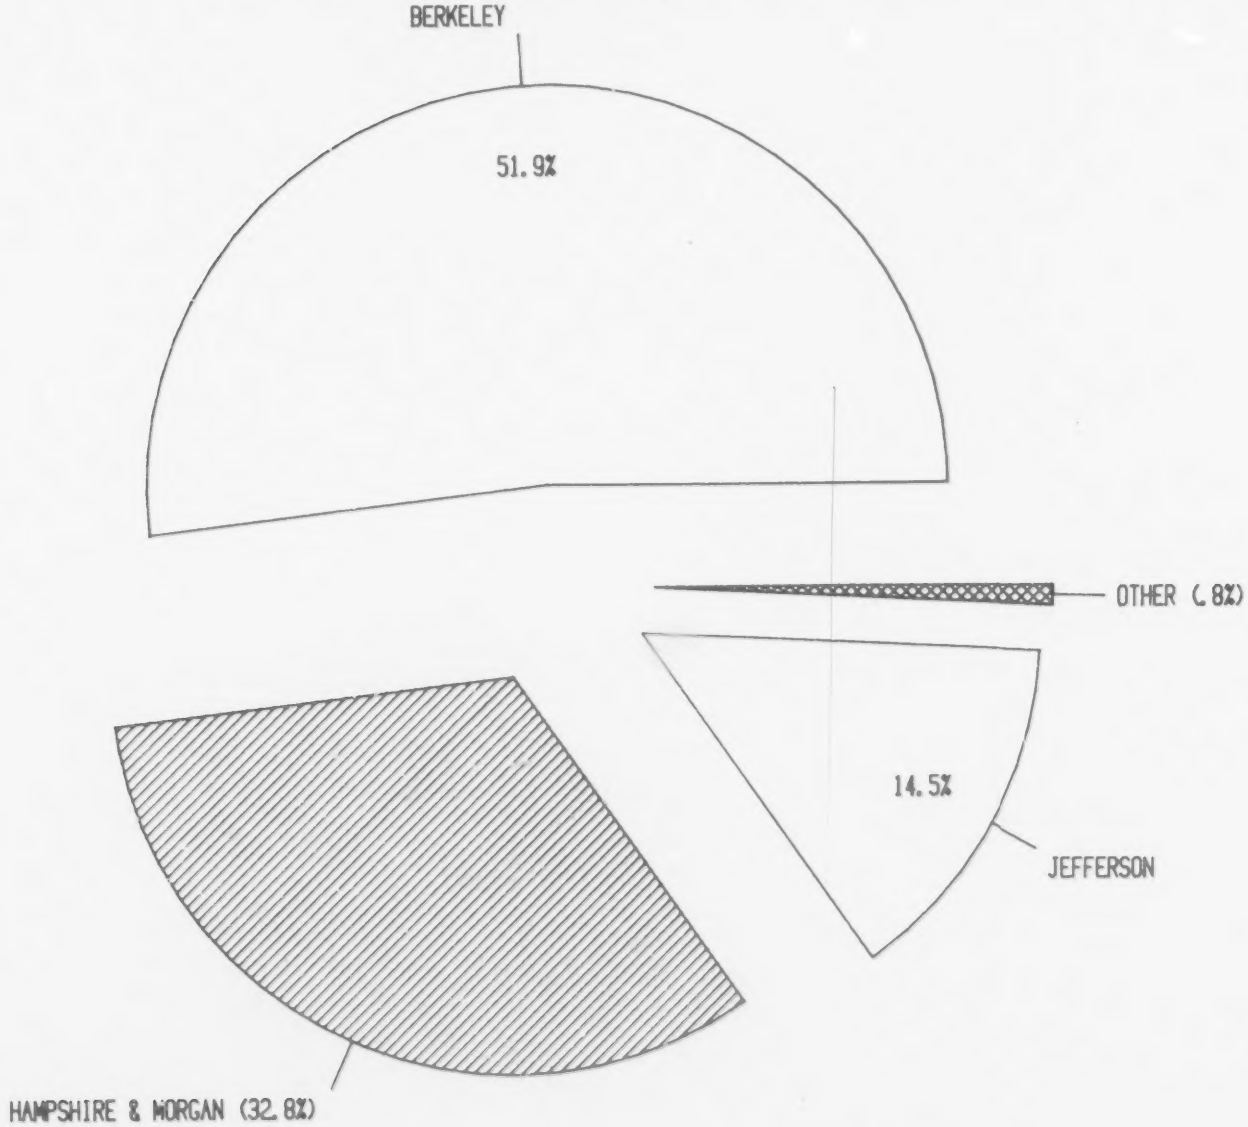
PERCENT OF TREES BY COUNTY



WEST VIRGINIA LIVESTOCK 1981

The number of cattle in West Virginia, as of January 1, 1981, was 570,000. This was a 5 percent increase over the previous year. The total inventory value was $239,400,000 as compared to $239,800,000 in 1980. The 1981 calf crop was 260,000 head, 2 percent below 1980. The number of dairy cows was 36,000, 3 percent below 1980.

Cattle and calf production totaled 135,580,000 pounds. The 94,933,000 pounds marketed was down 13 percent from 1980. Prices per hundred weight averaged $47.50 for cattle and $66.90 for calves. The gross income realized was $55,459,000 including home consumption. The gross income from dairy products was $48,447,000.

The number of hogs in West Virginia, as of December 1, 1980, was 73,000. This was a 30 percent increase from the previous year. The total inventory value was $5,220,000 up 64 percent from the previous year. The pig crop was 80,000 head, down 33,000 from the previous year.

Hog and pig production was 28,781,000 pounds, down 16 percent from 1980. The 22,270,000 pounds marketed was up 8 percent from 1980. The price per hundred weight averaged $44.60. The gross income realized, including home consumption was $14,488,000 up 21 percent from 1980.

The number of sheep in West Virginia as of January 1, 1981 was 108,000. This was a decrease of 4 percent from 1980. The total inventory value was $6,048,000, a decrease of 12 percent from 1980. The lamb crop totaled 100,000 head, down 4 percent from 1980.

Sheep and lamb production totaled 7,252,000 pounds. The 7,003,000 pounds marketed was down 12 percent from 1980. Prices per hundred weight averaged $17.90 for sheep and $54.30 for lambs. The gross income realized, including home consumption, was $3,331,000.

There were 102,000 sheep shorn during 1981. The average fleece weight was 5.8 pounds for a total of 592,000 pounds. The value of the wool produced was $515,000.

COMMERCIAL FEED STUFFS SOLD IN WEST VIRGINIA
JANUARY 1, 1981 - DECEMBER 31, 1981

Feeds, feed supplements and ingredients sold in West Virginia during 1981 totaled 172,936 tons. This compares to 178,358 tons during 1980. Contract feeds are not included in these totals.

The retail value of these feed stuffs (excluding vitamins) amounted to approximately 76.3 million dollars, an increase of 19 percent compared to a year ago. A major portion of the dollar increase is attributed to pet foods.

Cattle feed, mostly dairy, accounted for 48,602 tons or 28 percent of total sales. Pet food continued second in volume at 43,549 or slightly over 25 percent. Poultry, hog and horse feed remained next in order based on volume of sales.

FARM LABOR FORCE

Northeastern United States farm labor, excluding custom, totaled 524,000 workers during the week of July 11-17, 1982. Of the total, 195,000 were hired workers and 329,000 were farm operators and other unpaid workers. Northeastern United States included Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia and West Virginia.

All self-employed workers averaged 49.5 hours worked during the survey week, unpaid workers averaged 35.8 hours, and hired workers excluding custom averaged 35.9 hours.

Hired workers excluding custom received $3.55 per hour for field work, $3.30 per hour for livestock work, $5.68 per hour for supervisory and $3.22 per hour for other work. Workers paid by the hour averaged $3.72, workers paid piece rate averaged $3.56 and other methods of pay averaged $3.25.

WEST VIRGINIA CROP REPORTING SERVICE AVAILABLE REPORTS

West Virginia Monthly Farm Report issued monthly, this report covers the following major topics:

CROP PRODUCTION - Acres planted, harvested, yield and production; forecasts and final estimates.
GRAIN STOCKS - January, April, June, October.
HAY STOCKS - January, May.
FRUIT - Production forecasts and final estimates; January, July, August, October.
CATTLE - Inventory, calf crop and value; February.
AGRICULTURAL PRICES - Paid and Received; Monthly.
SHEEP - Inventory, lamb crop and value; February.
HOGS - Inventory, value and pig crop; December.
WOOL - Production, value and number sheep shorn; April.
LAYERS AND EGG PRODUCTION - March, June, September, December. (Includes all chicken inventory.)
MILK COWS AND PRODUCTION - January, April, July, October.
MANUFACTURED DAIRY REPORT - June.
LIVESTOCK SLAUGHTER - January, April, July, October.
FARM LABOR - August.
BROILERS - Eggs set and chicks placed by week.
TURKEYS - April.

Special items included as available.

Weekly Weather Crop Bulletin - Weekly update of weather and crop progress; May - October.

Annual West Virginia Agricultural Statistics usually published in October. Contains all crop and livestock estimates, State and County with historic comparisons.
